Meld. St. 22

(2018–2019)

Melding til Stortinget

Smartere innkjøp – effektive
og profesjonelle offentlige anskaffelser

White paper 22 (2018-19) :

**Smarter procurement – efficient
and professional public
procurement**

Increased innovation effect of public procurement:

- Public savings
- Environmentally friendly solutions
- Better services for users
- Sound market conditions for trade and industry

Meld. St. 45

(2016–2017)

Melding til Stortinget

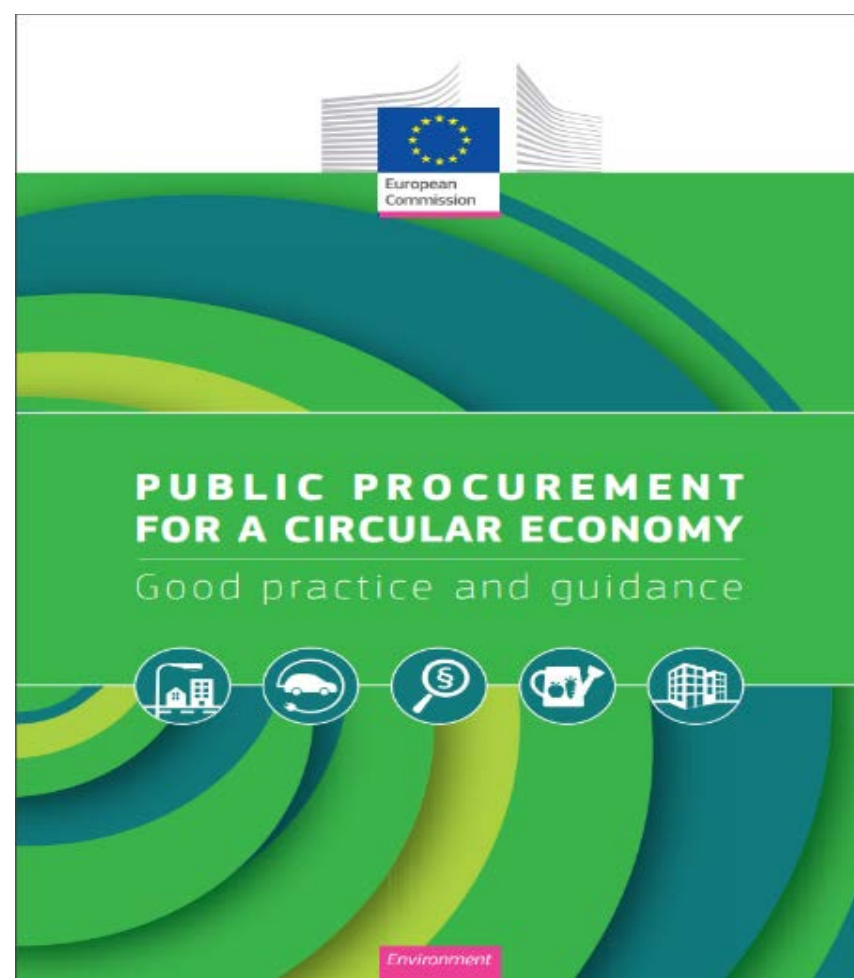

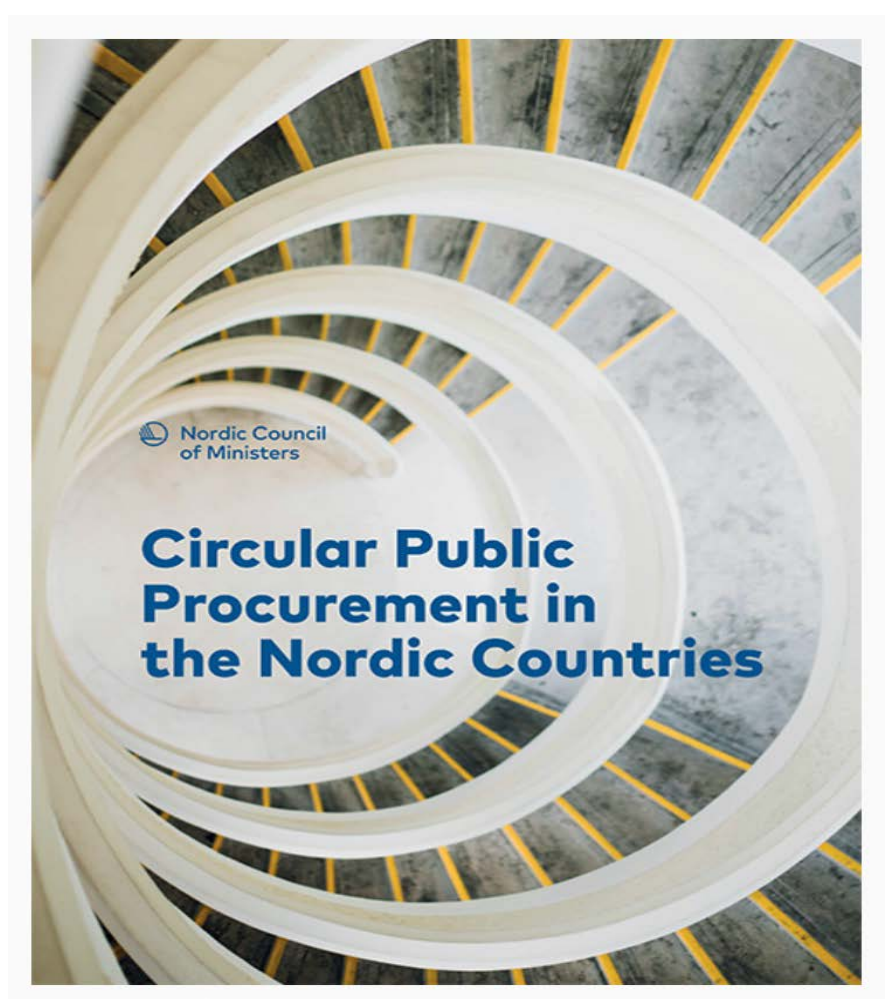

Avfall som ressurs
– avfallspolitikk og sirkulær økonomi

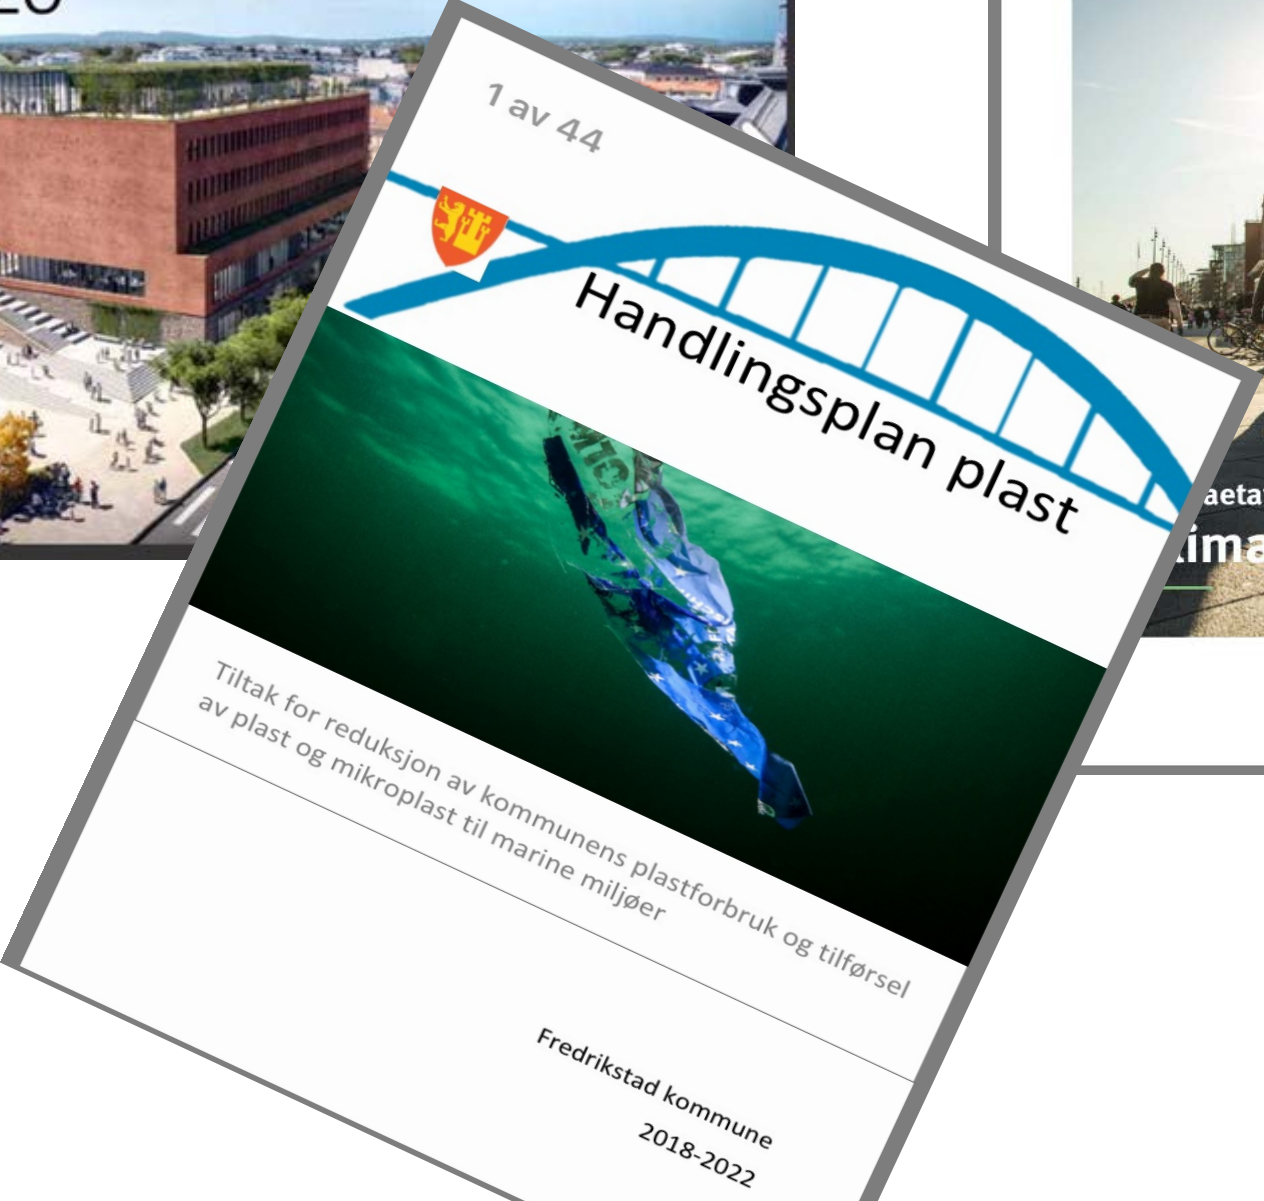

White paper 45 (2016-2017): Waste as a resource – waste policy and circular economy

FNs BÆREKRAFTSMÅL

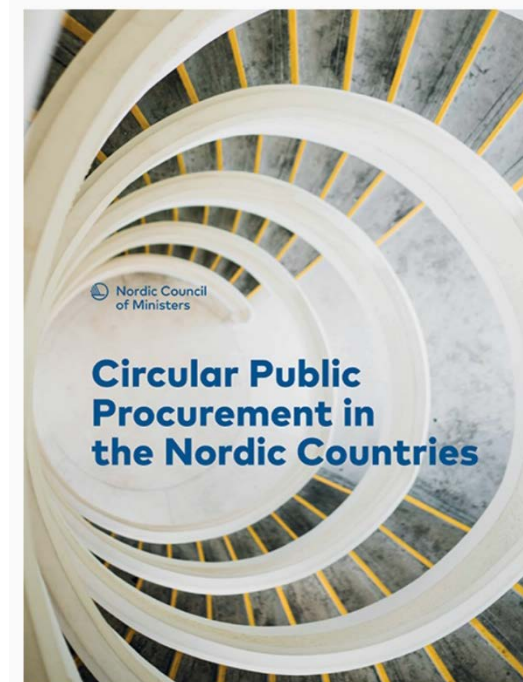

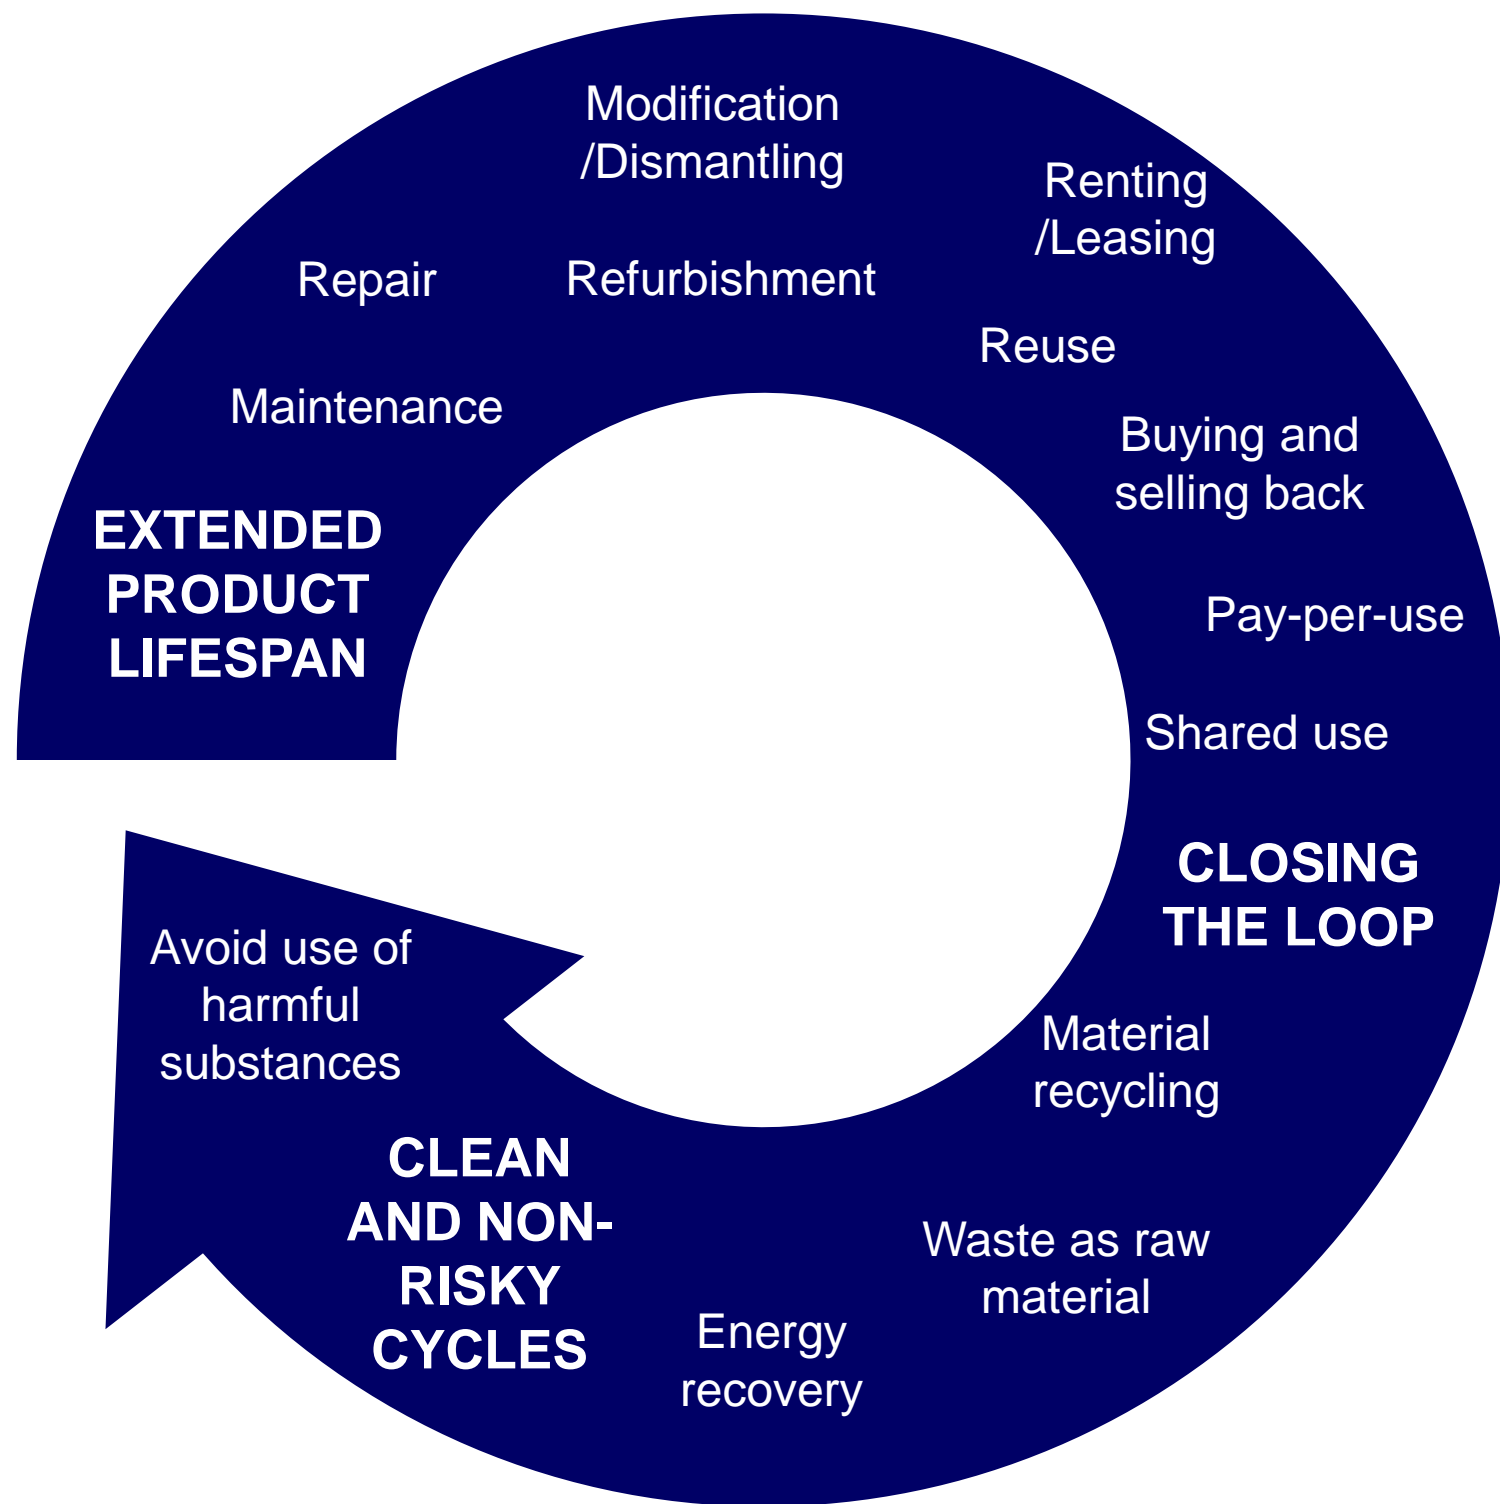

Norwegian Municipalities, County Councils and Public Enterprises with circular economy targets

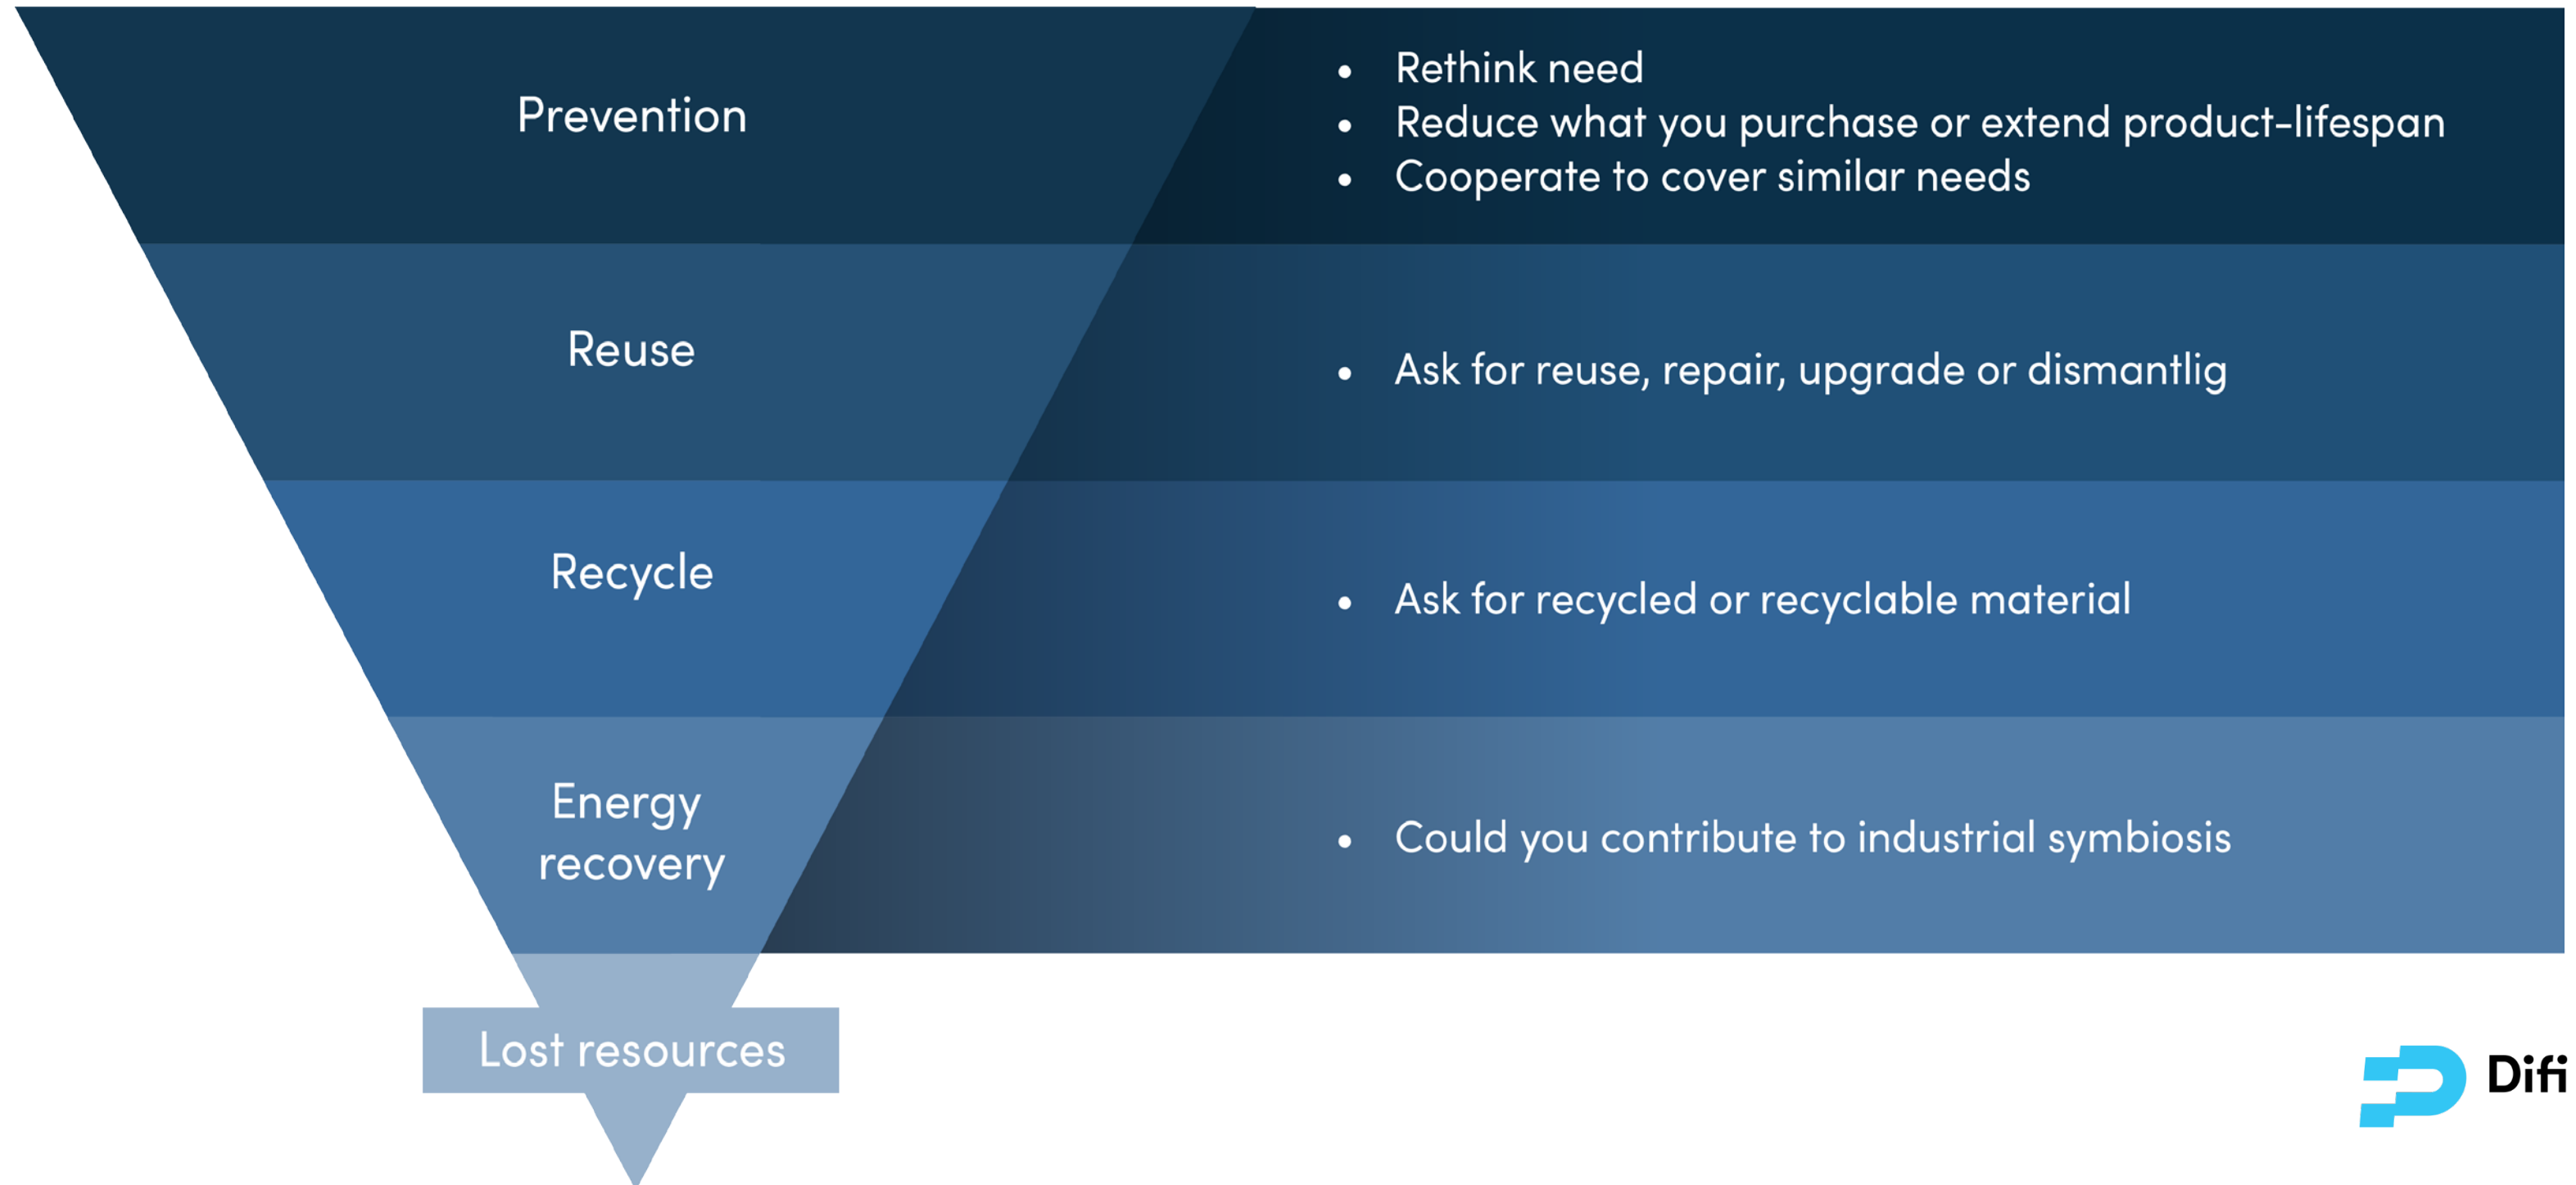

Circular procurement:

- **extended product lifespan**
- **closed energy and material loops**
- **clean and non-risky cycles**

Follow the priorities of the waste hierarchy

Innovation procurement

Important «components» of innovation-friendly procurement:

- Focus on needs
- Open specifications – functional and performance requirements instead of descriptive
- Market consultations
- Joint consultation or procurement
- The contract (bonus, option, test-field)

A Tool for Sustainable Public Procurement

Welcome to the Criteria Wizard. Here you will define your requirements for environment and social responsibility, and document a procurement process.

The requirements and the criteria sets are pre-defined for various product areas. By clicking through five steps you can select the requirements you want to use for the procurement.

What information do you need?

All selections have been ticked as standard. Remove the tick(s) for selections you do not wish to include in the printout.
